Subject: RE: Proposed Plan for the Peoples Natural Gas Superfund site in Dubuque, IA

Diana – thanks. I’ve reviewed the proposed plan and discussed with Jim Rost – the Iowa DOT has no objection to the preferred alternative (institutional controls and hydraulic containment system). We don’t anticipate attending the public meeting.

Also, yesterday in the mail we received the notice of the public meeting (June 2013 Fact Sheet). The envelope was addressed to Jerry Bergren, but he has been retired for a number of years. Since Jim Rost is expecting to retire within the coming year, can you make a note in the file to address future communications to my attention? Thanks.

Brad-

I’m sorry I was not able to send this to you yesterday. While I was on the phone with you our email went out and was out the rest of the day. If you have any questions don’t hesitate to give me a call.
